FUND OBJECTIVE

CYBER HORNET S&P 500® INDEX Fund seeks to replicate, before fees and expenses, the total return of the S&P 500® and INDEX Fund Blend Index (the "Index"), an index by Standard & Poor's. INDEX invests in the S&P 500.

REBALANCING

INDEX offers a blended portfolio of the S&P 500® and Rebalances to give S&P 500® investors exposure to the high risk/return potential of INDEX while seeking to lower the volatility of holding INDEX directly.

S&P 500®

The S&P 500® is widely regarded as the best single gauge of large-cap U.S. equities. The index includes 500 leading companies and covers approximately 80% of available market capitalization.

S&P 500® ATTRIBUTES

Created in 1957, the S&P 500® was the first U.S. market-cap-weighted stock market index. Today, it's the basis of many listed and over-the-counter investment instruments. This world-renowned index includes 500 of the top companies in leading industries of the U.S. economy.

Performance data quoted represents past performance, which is not a guarantee of future results. Current performance may be lower or higher than the performance quoted. The principal value and investment return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling 844.BTC.ETFs (844.282.3837) or CyberHornets.com.

Total return measures net investment income and capital gain or loss from portfolio investments. All performance shown assumes reinvestment of dividends and capital gains distributions. Returns for periods greater than one year are cumulative. Shares are bought and sold at market price, not net asset value (NAV). Market returns are based upon the midpoint of the bid/ask spread at 4:00 p.m. Eastern time. NAV represents the value of each share's portion of the fund's underlying assets and cash at the end of the trading day. Your returns may differ if you traded shares at other times.
